Sign In

- Sign In with e-mail and password

A mockup of a sign-in form. At the top is a grey header with the text "Sign In". Below this is a white box containing the text "Sign in to your account". There are two input fields: the first is for email, containing the text "admin", and the second is for password, containing seven dots. To the right of each input field is an icon (an envelope for email and a padlock for password). Below the input fields is a checkbox labeled "Remember Me" and a blue button labeled "Sign In". Below these is the text "- OR -". There are two social login buttons: a blue one with the Facebook logo and the text "Sign in using Facebook", and a red one with the Google+ logo and the text "Sign in using Google+". At the bottom is a link that says "I forgot my password".

Application will check the username with role or permission

I. Document

1. List

- User can search by filter date and keyword
- User can export data to excel

The screenshot shows a web application interface for document management. The sidebar on the left contains a user profile for 'admin' (Online) and a 'MAIN NAVIGATION' menu with links to Dashboard, Home, Document (highlighted), User management, Users Admin, Groups Admin, Roles Admin, and Helps. The main content area is titled 'Document' and 'Document/Index'. It features a search bar, 'From Date' and 'To Date' filters (both set to '04-May-2019'), a 'Keyword' filter (set to 'OS'), and a 'Search' button. Below the filters is an 'Export To Excel' button. The main content area also displays a table of documents with columns: Name, Summary, Tag, Total Files, and action icons. The table has two rows: 'Test' (Testing, OS, 2 File(s)) and 'Viewer' (Testing, Network, 2 File(s)). At the bottom right, there is a pagination control showing 'Previous', '1', and 'Next'.
